## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1 and 14 recite the broad recitations dryer and flow, and the claim also recites linen dryer and hot flow which is the narrower statement of the range/limitation.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 14 are considered indefinite because

of the broad limitation followed by a narrower limitation, as discussed above. Claims 2-13 are considered indefinite because of the dependence upon an indefinite claim.

Examiner will treat the claims under the prior art under the broadest reasonable interpretation of the claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. (US 5,899,005). Chen is considered to disclose the claimed dryer comprising:

a dryer, in particular a dryer to dry linen and the like, with a drying drum **12**, drive means **44** to rotate the drying drum, means to create an air flow **38**, more in particular a hot air flow and air conduction means to lead the air flow through the drying drum, wherein the air conduction means have been thus conceived that the air flow is mainly forced to enter the drying drum from an inlet **40**, before being discharged via an outlet **56**, whereby this air thereby is also forced to enter the drying drum via one or more air passage openings **36** which are located at the cylindrical casing part of the drying drum and/or at one axial end of the drying drum, but near the outer circumference thereof. Chen is also considered to disclose all air passage openings to bring air in the drum at column 2 lines 28-59, one zone that stretches as a band around the cylindrical casing

part to form a band-like zone at column 3 lines 49-59, a rear half in figure 1, and diagonally opposite air conduction also shown in figure 1.
